

# Arsenii Koniachenko

## Full-Stack Blockchain Developer

■ Loutraki, Greece | ■ arsk293@gmail.com

GitHub | LinkedIn | Upwork | Portfolio

## Profile Summary

I am a full-stack developer with a passion for building decentralized applications and trading systems. Skilled in blockchain, backend, and frontend technologies, I'm a fast learner dedicated to writing clean, scalable code and constantly improving my skills.

## Technical Skills

Languages & Frameworks: Python, TypeScript, Solidity, Node.js, React, Next.js, FastAPI, Express

Databases: PostgreSQL, MongoDB

Blockchain & Web3: ethers.js, Hardhat, web3.py

## Professional Experience

### Full-Stack Developer — Vsedozvoleno

March 2025 – Present | Kyiv, Ukraine (Remote)

- Developed backend services using FastAPI integrated with Web3 for blockchain data operations.
- Built responsive frontends using React.
- Collaborated in an agile environment to deliver end-to-end product features.

### Full-Stack Developer — TheBuidl

February 2025 – March 2025 | Canada (Remote)

- Contributed to web3 full-stack projects using React, Express, and TypeScript.
- Implemented smart contract integrations and decentralized user interactions.

### Full-Stack Developer / Data Engineer — Algo-Zeus

July 2023 – December 2024 | London, UK (Remote)

- Developed data pipelines and APIs for trading analytics platforms using Python and FastAPI.
- Worked on the frontend using Jinja for templating and backend integration.
- Built the company's landing page using Next.js for performance and SEO optimization.
- Used Apache Airflow to orchestrate backend data processing and automation tasks.
- Improved system performance and scalability for high-frequency data processing.

### Python Developer — Vsedozvoleno

January 2023 – September 2023 | Kyiv, Ukraine (Remote)

- Built and optimized algorithmic trading strategies using Python and PineScript.
- Automated data collection, analysis, and backtesting processes for trading insights.
